---

At Pawsitive Strides Veterinary Rehabilitation & Therapy (PSVRT) we feel that a working relationship with our referring veterinarians is an integral part of our patient's success. PSVRT does not provide primary care services. We work hand-in-hand with the referring veterinarian to ensure the highest quality of care for each patient. Because of this, we do not do anything in our clinic that would normally be done by the RDVM.

During our Rehabilitation Veterinarians' initial exam, Dr. Nancy Peterson may find that she needs radiographs taken.

Please choose how you would like us to proceed by checking from the list below.

- I would like for you to take any radiographs necessary at your facility.
- I would like for you to contact me regarding any necessary radiographs.
- I would like to handle any necessary radiographs in our clinic.

We make it a priority to facilitate communication between our practitioners and our patients' referring veterinarians. After every evaluation at PSVRT a thorough report is sent promptly to the patient's primary veterinarian and specialist (if applicable). If you have any questions about a patient's care at PSVRT please do not hesitate to contact us.

While PSVRT is associated with Ingersoll Animal Hospital and some initial Rehabilitation exams and treatments may be done at Ingersoll Animal Hospital, PSVRT is a separate entity, working directly with the patients' referring veterinarians. Out of respect for our referring veterinarians, clients referred to

PSVRT sign a waiver agreeing not to pursue primary care with Ingersoll Animal Hospital.

If you have any questions please feel free to contact our office.

We thank you for referring your clients to us.
